LOADBYTON OS / IDENTITY SYSTEM 1.0

LOAD | BY | TON.store

A record follows the movement.

Your logistics company, connected.

BASED ON PROJECT-LOADBYTON / 8c0e8e9

REVIEW CANDIDATE / OWNER APPROVAL PENDING

01 / BRAND CORE

Clarity behind every movement.

Purpose: help logistics companies keep operational records, source documents and commercial context in one workspace.

Audience: owners, finance teams, forwarders, dispatchers, warehouse operators and delivery coordinators working in the UAE.

Personality: precise, dependable, direct, connected and practical.

Brand architecture

- **LOAD|BY|TON:** the parent identity shared with Project-Loadbyton.
- **LOAD|BY|TON.store:** commerce and operating workspace identity.
- **Loadbyton OS:** the repository/product shorthand. Use the operating-platform descriptor when context is needed.
- **Products:** Freight, Transport, Warehouse, Fulfilment, Delivery, Customs, Finance and Intelligence. Lockups express a family; they do not assert commercial availability.

Primary lines

“Your logistics company, connected.”
“Run the movement. Know the margin.”

> The reference project is a freight marketplace. OS copy describes company operations; do not import escrow, owned fleet, guaranteed activation, regulator approval or other claims without evidence.

02 / LOGO SYSTEM

Two dividers.
One context.

The parent wordmark follows the reference: heavy Geist type, two red dividers and a stacked B/Y. OS masters contain only vector paths, with no raster embedding or required fonts.

Clear space and size

- Keep at least 18 native units around the drawn full logo, equivalent to the left inset. Increase surrounding whitespace in print and covers.
- Use the full .store logo at 156 CSS px wide or more. Use the BY icon below this size.
- Use the icon at 16 px or more; favicon.svg is drawn for small sizes. Use the 512 px maskable file for adaptive app surfaces.
- Use navy on white/cream, and white on navy. Monochrome variants are available for one-colour production.

Do not

Stretch, rotate, bevel, blur, add a shadow, change divider colours, recreate the wordmark with typed text, place it on a busy photograph, or present the reference project's malformed icon SVG as a vector master.

MASTERS / SVG · PRINT / PDF · SHARING / PNG

03 / COLOUR

Structure. Signal. Space.

Navy

#0F2B3D

Red

#E53935

Warm white

#FFFDF7

Role	HEX	RGB
Structure / Navy	#0F2B3D	15, 43, 61
Identity / Red	#E53935	229, 57, 53
Accessible action / Deep red	#C62828	198, 40, 40
Canvas / Warm white	#FFFDF7	255, 253, 247
Body / Ink	#0F2129	15, 33, 41
Secondary text / Slate	#586A72	88, 106, 114

Aim for 60–70% neutral canvas, 25–35% navy structure and at most 10% red accent. Use blue only for links/data distinctions; green and amber communicate labelled status.

Accessibility and print

Small white text on #E53935 falls below 4.5:1. Use #C62828 for small button labels. Status always includes text or an icon, not colour alone. The generated contrast report checks defined pairs in both themes.

HEX and RGB are authoritative. CMYK estimates in colour-specs.json are unprofiled starting points; ask the printer to convert using its press/paper ICC profile and approve a physical proof. PDFs are vector RGB proof files, not certified PDF/X production files.

04 / TYPOGRAPHY

Readable operations.

GEIST / DISPLAY

Movement has context.

INTER / BODY

Clear actions.
Specific records.
Useful evidence.

JETBRAINS MONO

LBT-2026-001
AED 12,450.00

Use	Size / line height	Weight
Cover / hero	48–60 px / 1.1	600–700
Page title	30–38 px / 1.15	600–700
Section title	24 px / 1.25	600
Body / form	16 px / 1.55	400–500
Labels / data	12–14 px / 1.45	500–600

Use Inter for long passages and tabular figures for money. JetBrains Mono is an accent for identifiers and short data, not body paragraphs.

Noto Sans Arabic is included for Arabic-script rendering and RTL layouts. Arabic brand transliteration, translated copy and legal/tax wording still require native-speaker and qualified review. The Latin wordmark must not be mirrored in RTL.

> Fonts are self-hosted WOFF2 under SIL OFL 1.1, with notices in fonts/. Templates with editable text need these fonts installed in your design tool. Outlined SVG/PDF copies remain portable without them.

A common visual rhythm.

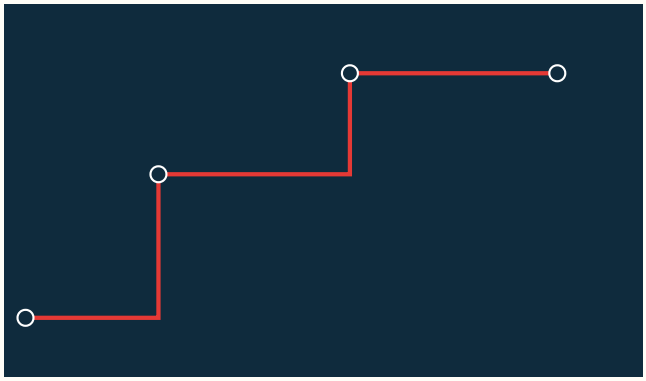

Illustration and imagery

Use flat geometry, container-grid rhythm, route lines and two-divider accents. Original vector illustrations cover shipments, warehouses, documents, cash control and honest empty/restricted/maintenance states.

For photography, use permitted images of actual ports, loading areas, warehouse details and people doing real work. Prefer quiet compositions, navy shadows, natural light and space for text. Avoid random office stock, fictional certifications, AI robot imagery and photos that imply an owned fleet or real customer endorsement.

Icon system

Twenty-four original 24-unit icons use a 1.7-unit stroke and round joins. Eighteen map to the sector catalogue; the rest cover finance, intelligence, documents, security, support and settings. Use one optical size and stroke weight together.

Motion

Use short, purposeful state changes. Support prefers-reduced-motion. The identity does not depend on animation or a cinematic background.

06 / VOICE AND CLAIMS

Say what happens.

Write like an operator: direct, specific, numerate. Connect actions to source records. Separate pilots, planned integrations and verified availability.

Use	Avoid
“Review the source document.”	“Unlock seamless compliance.”
“Awaiting independent finance review.”	“Your money is guaranteed safe.”
“Cards and eligible wallets through hosted checkout.”	“Every UAE customer can use Google Pay.”
“Manual Customs evidence handover.”	“Official Mirsal clearance built in.”
“Pilot availability requires confirmation.”	“Every sector is production certified.”

Templates and personal details

Square brackets are intentional editable placeholders. Replace them with verified contact/legal information before sharing. Do not insert fictional customer statistics, account details, signatures, tax identifiers or social proof.

Invoice, packing list and POD layouts are visual stationery. They do not issue a national e-invoice, certify clearance, record a payment, or prove delivery. The application workflow and verified source evidence determine those states.

From tab to document.

Surface	Supplied size / format
Browser / app	SVG favicon; ICO 16/32/48; touch 180; app 192/512; maskable 512
Social	1080 square; 1080 × 1350 portrait; 1080 × 1920 story
Sharing / covers	1200 × 630 OG; LinkedIn post/company/personal; X; YouTube safe-area cover
Web / email	1920 × 960 hero; 1200 × 320 email header; editable HTML signature and email templates
Presentation	1920 × 1080 cover/content/closing; editable PowerPoint deck
Stationery	85 × 55 mm card; A4 letterhead/proposal/one-pager; DL envelope; staff badge
Document layouts	Invoice, packing-list and POD visual templates

Print artboards include 3 mm bleed where stated. Keep live content at least 5 mm inside trim. Staff badges have no automatic bleed. The guide and PDFs do not add crop marks; printers must confirm imposition, paper, colour profile and trim.

Source and rebuild

brand.config.json is the brand/copy/contact inventory. scripts/build-brand.py regenerates vector masters and templates; scripts/export-brand.mjs exports PNG/PDF and app icons; scripts/package-brand.py generates colour/contrast reports, editable PPTX and the checked ZIP.

JSON tokens ↗ CSS tokens ↗ Asset catalogue ↗ Approval checklist ↗

Ready for review.

Reference: Project-Loadbyton at commit `8c0e8e9f5239b1689f333ec21cdb9cdffc7e2fa4`, its brand guidelines, tokens and text-based full wordmark. Its malformed icon SVGs were inspected but not reused. The OS .store extension, outlined masters, flat BY mark, icons, templates and library are new derivatives created for this repository.

The reference MIT notice is included in licenses/. Font packages are Fontsource Variable 5.3.0 with each OFL notice retained. Font outlines are included only as artwork; the original font files retain their original names and notices.

Approval remains pending

- Owner acceptance of the parent/.store/OS architecture, rebuilt BY icon, palette and templates.
- Independent trademark clearance where required and review of licensed third-party content.
- Native review of Arabic brand/copy and qualified review of legal/tax wording.
- Registrar evidence for domain ownership; a brand asset or DNS challenge is insufficient.
- Real support/governance owners, market evidence and commercial acceptance.
- Print proof and target-device review before external distribution.

> This pack closes the missing vector-master and asset-production work. It does not close the separate e-invoicing, Mirsal, live feed, OCR, general-ledger, foreign-currency, device-feed or business-evidence gates.
